

HCR Manor Care Chooses PointClickCare On-Demand Clinical Electronic Medical Record & Business Office Software for Long Term Care Operations

Mississauga, Ontario December 12, 2005 – Mike Wessinger, President and CEO of Mississauga-based Wescom Solutions Inc., today announced that HCR Manor Care will use Wescom's PointClickCare On-Demand long-term care (LTC) software in its 340 skilled nursing and assisted living facilities throughout the United States.

HCR Manor Care selected the PointClickCare on-demand software to manage the company's clinical and financial information after the completion of a twelve-month pilot project. Implementation has begun and is expected to be completed within two years. PointClickCare's on-demand delivery model differs from typical software because the application is delivered as a hosted subscription service. This enables HCR Manor Care to have an enterprise-wide, fully integrated clinical and financial solution without the cost and hassle of buying, installing or maintaining any hardware or software.

Mike Wessinger stated, "We are excited to be working with one of the industry's most admired companies and expect that working with HCR Manor Care will continue to fortify our service for multi-facility providers." Wessinger further added "HCR Manor Care's choice of PointClickCare validates the appeal of our on-demand delivery model with the largest companies in the industry. Now, organizations ranging from a single facility to the largest multi-facility corporations are realizing the benefits of on-demand software delivery. It's a powerful advantage that more and more multi-facility providers are capitalizing on, and a trend we expect to continue to grow rapidly."

Murry Mercier, VP, Director of Information Services of HCR Manor Care, stated, "Use of Wescom's on-demand software delivery model supports the cost-effective delivery of functionality to our facilities. Web-based, centralized architecture allows us to take advantage of the benefits of technology without the burden of support, focusing our attentions on satisfying business requirements."
