

## LTCQ and PointClickCare Now Offer One-Button Convenience to Help Ensure Quality and Accurate Reimbursement

---

**Ohio Health Care Association Conference and Exposition, Columbus, Ohio April 24, 2006** – LTCQ Inc. and PointClickCare.com have announced their partnership to help Long Term Care providers ensure the accuracy of their Minimum Data Set (MDS) assessments which are used to determine reimbursement and quality measures.

Soon, mutual clients will be able to submit their completed MDS assessment to LTCQ's patented Data Integrity Audit™ from within PointClickCare's application with just a click of a button. Each assessment is then systematically checked by over 400 proprietary tests that highlight clinical or logical inconsistencies, risk management opportunities and documentation requirements.

"We are delighted to offer this benefit to our mutual clients", said Rodrigo Navarro, LTCQ's President and CEO. "This interface will save significant staff time and ensure that every MDS assessment is checked for accuracy prior to state submission. Both LTCQ and PointClickCare are dedicated to providing clients outstanding service and this interface is just one example."

Mike Wessinger, President and CEO stated: "PointClickCare is thrilled to integrate with LTCQ to deliver value-added capabilities with no hassle to the customer." Mike added, "we always envisioned being able to offer additional high-quality services from our partners, which are immediately available and seamless to our customers."

### **About PointClickCare:**

PointClickCare is the creator of the leading on-demand Clinical Electronic Medical Records and Business Office software to the Long-Term Care (LTC) industry. PointClickCare has been online serving providers of all sizes since 2000 and is used by over 2,500 Long-Term Care centers in Canada and the United States.
